

Mrs. Nolin

Natick Public School

Natick, MA

Dear Mrs. Nolin:

I am officially requesting the use of the Patent #US20140360420 A1 for the multi-component robot for below ice search and rescue submersible to be used as my senior Capstone Project at WPI. This is a non-profit endeavor for use by the Worcester Fire Department. As one of the patent inventors, I'm looking to build this under ice robot using the existing specifications for the practical usage of the community of Worcester. Again, this is not for profit; it is only for hands on experience in building the physical robot.

Thank you very much.
